

// SUMMARY

Software developer and CS graduate with a background bridging operations and engineering. Designed and shipped production tools for real business use, including scheduling systems, inventory platforms, and automation pipelines. Currently freelancing on a cross-platform business application while taking on independent client projects across web, mobile, and automation.

- // WORK EXPERIENCE
- Software Developer — Undisclosed Company — Freelance

stack: Flutter · Dart · PHP · MySQL

May 2026 – Present

 - Developing a cross-platform business application as part of an embedded development team
 - Own full-stack delivery: UI in Flutter/Dart, backend API and database in PHP/MySQL
- Aftersales Administrator — Khonaysser Group, Naher el Mot

Mar 2025 – Apr 2026

 - Ran aftersales operations across 400+ customer entries in the ERP system, covering client records, quotations (100–200+ monthly), and contract issuance (200+ yearly)
 - Built a system that automatically surfaces 10–15 overdue generator services daily that previously took manual tracking and cross-referencing to catch, keeping the client fleet on schedule
 - Coordinated job assignments across ~10 two-person technician teams and was their go-to resource on generator specs and service history
 - Onboarded 2 new employees, training one on internal systems and workflows and directly supervising the other
 - Identified workflow gaps and built four internal tools adopted org-wide: a scheduling/dispatch platform, spare parts intake system, maintenance contract portal, and Python automation suite (see Projects)
- Telecom Intern — Ogero HQ, Bir Hassan

Jul 2024 – Aug 2024

 - Attended technical workshops on fiber optics, network protocols, and ISP infrastructure; delivered a final report and presentation on ISP operations

- // PROJECTS
- INTERNAL / PRODUCTION – KHONAYSSER

 - Scheduling & Dispatch Platform** [React · Vite · Supabase] — map-based job assignment and technician tracking with mobile field interface
 - Spare Parts Digital Intake System** [React · Vite] — replaced paper-based stock intake; still in production
 - Maintenance Contract Portal** [React · Python] — tracks contract renewals and service coverage per client
 - Python Automation Suite** [Python · Pandas · VBA · Bash/CMD]
 - OCR pipeline extracting data from scanned reports and linking entries automatically
 - Automated the daily required reports, saving hours of manual work weekly
 - Automated warranty claims processing
- INDEPENDENT / FREELANCE

 - Mobile Market Delivery App** [Flutter · Dart] — grocery and goods ordering app for a company client
 - Invoicing System** [React · Vite] — automated invoice generation and management
 - Collections Tracking System** [Kotlin · Jetpack Compose · Room/SQLite] — native Android app for tracking recurring subscription collections, offline-first
 - Retail POS & Inventory Systems (x3)** [React · Vite · Python · SQLite] — shared core architecture adapted for three retail verticals (cleaning products, footwear, menswear); dual retail/wholesale pricing, barcode printing/scanning, variant management
 - Legal Case Management Platform** [React · Vite] — confidential client; case content publishing with role-based admin dashboard

// TECHNICAL SKILLS

programming

Java, Python, C#, SQL, Bash

web dev

HTML, CSS, JavaScript, React.js, Vite, PHP, Flutter, Dart

tools

Supabase, Vercel, Git, VS Code, Android Studio, WAMP, MySQL

ai dev tools

Claude Code, Antigravity, Codex, Google AI Studio, Cursor, Windsurf, Replit

creative ai

Lovable, Desygner, Higgsfield, Nano Banana Pro, HeyGen, CapCut AI, ElevenLabs, Suno, Midjourney, RunwayML, Kling, ChatGPT Image

automation

Workflow automation, OCR, AI-assisted development

data

Relational databases, data entry systems, record management, data validation

// EDUCATION

B.S. Computer Science

Arab Open University, Lebanon — Graduated Jul 2024

GPA: 3.66 / 4.00

// CERTIFICATIONS

- Proactive Maintenance & Troubleshooting — TotalEnergies Marketing Lebanon
- AI Training Hackathon (Foundational AI Proficiency) — Kanz AI / LAU Academy of Continuing Education, Jul 2026
- Telecom Internship Program — OGERO, Aug 2024

// LANGUAGES

Arabic – Native

English – Fluent

French – Proficient
